PROJECTS

• LoanOK - Loan Application System

Project

Github

- Developed a loan application system using the **MERN stack (MongoDB, Express, React, Node.js)** with **Auth0 authentication**.
- Implemented a **loan tracking feature**, allowing users to apply for loans, receive an **Application Number**, and track their status.
- Integrated **EmailJS** for automated email notifications.
- Designed a responsive frontend with **React and TailwindCSS**, ensuring a smooth and user-friendly experience.
- Built an **admin dashboard** for managing loan applications, updating statuses, and reviewing user-submitted documents.

• Full-stack Booking Application

Project

Github

- Developed a full-stack booking application using the **MERN stack (MongoDB, Express, React, Node.js)** with **user authentication** and **account management**.
- Implemented features for **dynamic photo uploads**, including upload by link and from devices, to support **listing** and **editing** of accommodations.
- Built core **booking functionality** allowing users to **create**, **view**, and **manage bookings**, enhancing the overall user experience.
